This guide explores the mechanics, perk games, strategies, and data that specify this modern-day casino work of art.

What is Crazy Time?

Launched in 2020 by Evolution, Crazy Time is built on the massive success of earlier wheel-based video games like *Dream Catcher* and *Monopoly Live*. Hosted by charming speakers in a vibrant, circus-themed studio, the video game revolves around a giant, 54-segment mechanical wheel.

The main goal for gamers is easy: predict which segment the wheel will stop on after the host provides it a spin. However, the video game goes far beyond standard thinking by integrating a Top Slot multiplier function and 4 immersive reward rounds that can cause payouts of as much as 25,000 x the gamer's stake.

The Wheel Breakdown

To understand how the video game works, one should initially look at the circulation of sections on the main money wheel. There are 54 sections in total, divided among numbers and bonus video games.

Sector Type Number of Segments on Wheel Payment/ Function **1** 21 Pays 1:1 **2** 13 Pays 2:1 **5** 7 Pays 5:1 **10** 4 Pays 10:1 **Coin Flip** 4 Triggers the Coin Flip perk round **Money Hunt** 2 Sets Off the Cash Hunt reward round **Pachinko** 2 Sets off the Pachinko perk round **Crazy Time** 1 Activates the supreme Crazy Time perk round

The Top Slot: Doubling Down on Excitement

Before every single spin of the main wheel, a two-reel **Top Slot** spins simultaneously above the primary video game. One reel arbitrarily selects a bet spot (a number or a benefit video game), while the other reel chooses a random multiplier (varying from 2x up to 50x).

If the bet area and the multiplier align horizontally on the Top Slot, that multiplier is used to the matching segment for that spin. If the primary wheel lands on that section, all wins for that number or reward game are increased appropriately. This function is the main engine behind the video game's most jaw-dropping payments.

3. Pachinko

- **How it works:** Inspired by the conventional Japanese arcade game, Pachinko features a large wall filled with physical pegs. The host drops a puck from the top, and it bounces randomly down the board till it lands in among a number of multiplier zones at the bottom.
- **Unique function:** If the puck lands in a "DOUBLE" zone, all multipliers at the bottom of the wall double, and the host drops the puck once again, enabling compounding multipliers.

4. Crazy Time
