As the plane climbs higher, the prospective payment multiplier boosts. The difficulty-- and the excitement-- depends on timing the cash-out button perfectly. Wait too long, and the airplane crashes, resulting in a lost stake. Money out too early, and potential revenues are left on the table.

2. **The Ascent:** Once the betting window closes, the airplane removes. A multiplier begins ticking upward from 1.00 x, rising continually as the airplane gains elevation.
3. **The Cash-Out:** Players must manually strike the "Cash Out" button before the airplane crashes. If effective, the initial stake is multiplied by the current worth at the specific moment of withdrawal.
4. **The Crash:** At an entirely unpredictable moment figured out by the RNG, the flight ends. Any active bets that have actually not been squandered are surrendered.
