2. Departure and Ascent

As quickly as the plane leaves the runway, the multiplier starts at 1.00 x and starts climbing up. The longer the flight lasts, the greater the multiplier goes. Nevertheless, the danger of the flight ending quickly also increases with every passing second.

3. The Cash-Out Dilemma

The supreme mechanic of the game is the cash-out button. Gamers must by hand push this button to collect their current winnings (Stake × Current Multiplier) before the flight concludes. If the flight ends before a cash-out takes place, the stake is lost.
