Diving Into the Four Bonus Rounds

The real heart of Crazy Time depends on its four reward video games. Triggering one of these rounds transports gamers from the main studio into a special increased reality mini-game.

1. Coin Flip

The most basic of the reward rounds. A coin with a red side and a blue side is turned by a mechanical arm.

- Before the flip, random multipliers are appointed to both the red and blue sides.
- Whichever side lands deal with up wins the multiplier for the participating players.
- If the multipliers are low, a "Rescue Flip" can often be triggered, giving gamers another chance at greater rewards.

2. Cash Hunt

This benefit video game includes a massive screen displaying 108 random multipliers concealed behind shooting gallery symbols (like a cactus, a target, or a duck).

- Players use an on-screen crosshair to aim and shoot at one sign before the timer runs out.
- When time expires, all signs expose their hidden multipliers, and the gamer receives the multiplier behind their chosen target. Every player gets to choose their own spot, meaning different gamers can win different quantities.

3. Pachinko

Motivated by the standard Japanese arcade video game, Pachinko features a glowing, vertical board filled with physical pegs.

- The host drops a puck from the top of the board.
- The puck bounces arbitrarily down through the pegs till it lands in one of the multiplier zones at the bottom.

- If the puck arrive at a **"Double"** value, all multipliers at the bottom of the board double, and the puck is dropped again, leading to possibly massive payouts.

4. Crazy Time

The ultimate perk round takes players behind a red door into a surreal, whimsical virtual world featuring an enormous, 64-segment wheel.

- Gamers must pick among three flappers: **Green, Blue, or Yellow**.
- The host spins the huge wheel.
- Whichever segment the selected flapper indicate when the wheel stops is the prize granted.
- The wheel consists of **"Double"** and **"Triple"** sections. If a flapper lands on among these, all multipliers on the wheel double or triple, and the wheel is spun again. This is where the game's famous 20,000 x max multiplier can be achieved.
