Aviator is a social multiplayer crash game. The core concept is stealthily easy: a plane takes off, and as it ascends, a multiplier increases. Gamers place one or two bets before the round starts and need to hit the "Cash Out" button before the airplane flies away. If they squander successfully, they win their bet increased by the current coefficient. If the airplane flies away (crashes) before they cash out, the bet is lost.

Unlike standard slots where the result is figured out completely behind the scenes by a Random Number Generator (RNG) spinning invisible reels, Aviator puts the aspect of timing directly into the gamer's hands.

    - *Objective:* Balancing safety with the thrill of going after a huge payout.
- **The Martingale System (Use with Caution):**
