- **The Bonus-Hunter Strategy:**

- Placing wagers exclusively on the 4 benefit round sectors (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). This technique accepts that base game number hits will yield no return, intending rather to strike the high-paying benefit rounds where the massive multipliers live.

- **The Spread-The-Risk Approach:**

- Betting small quantities across almost every sector on the board. This makes sure that the player enters nearly every perk round or hits frequent number payments, though it requires careful management to guarantee wins surpass the overall expense of the bets.
