What is Crash Gambling?

At its core, crash gaming is a multiplayer, online betting game focused around an escalating multiplier. Gamers place a bet, and as the round starts, a multiplier curve starts to rise-- beginning at 1.00 x and in theory climbing up infinitely.

The goal is simple: **cash out before the game randomly "crashes."**

If a gamer effectively cashes out at 2.50 x, they double their wager (minus a tiny home edge). However, if the video game crashes before they squander, they lose their entire bet for that round. The twist is that crashes can occur at any millisecond-- often quickly at 1.00 x, and other times skyrocketing past 100x or perhaps 1,000 x.

A Typical Round: Step-by-Step

1. **The Betting Window:** Players have a quick window (normally 5 to 10 seconds) to place one or two bets for the upcoming round.
2. **The Lift-Off:** The round begins. A rocket, line, or visual multiplier begins to rise from 1.00 x upward.
3. **The Decision:** Players see the multiplier climb in real time, making a split-second choice to click "Cash Out" to secure their present earnings.
4. **The Crash:** Suddenly, the video game stops. A "Crashed at X.XX" message appears. Anyone who hadn't squandered loses.
