2. **Mines:** Revealing a mine lead to the loss of your stake and an instant end to the round.

The essential appeal of the game lies in the "Cash Out" mechanic. Gamers can pick to stop at any time after exposing a reward, protecting their present jackpots. The longer a gamer continues to click tiles without striking a mine, the higher the multiplier climbs-- but the statistical likelihood of hitting a mine increases with every effective pick.

Secret Game Variables

To master the game, gamers should comprehend how these variables affect the possible result:

- **Grid Size:** Some versions allow you to change the grid (e.g., 2x3, 3x6, 5x5). Smaller grids have less mines but lower rewards; larger grids provide massive multipliers however significantly greater risk.
