This extensive guide explores what the Ghost 2 is, how it works, why expert installation is important, and what automobile owners can anticipate throughout the installation procedure.

What is the Ghost 2 Immobiliser?

Established by Autowatch, the Ghost 2 is the world's first aftermarket CAN-bus (Controller Area Network) immobiliser. Unlike standard immobilisers that depend on bulky crucial fobs, additional tags, or cutting factory wiring harnesses, the Ghost 2 is totally hidden within the vehicle's existing wiring network.

The gadget interacts calmly with the vehicle's electronic control unit (ECU). It prevents the engine from starting unless a distinct, user-defined PIN code-- comprising a series of presses on existing factory buttons (such as guiding wheel controls, door panels, or the center console)-- is gone into.

Secret Features of the Ghost 2:

- **No Key Fobs or Tags:** Nothing extra to bring, lose, or have actually taken by thieves.
- **Undetectable by Scanners:** Thieves can not detect the unit utilizing diagnostic scanners or radio frequency devices.
- **No Wire Cutting:** The installation leverages the lorry's existing information network, preserving the maker's guarantee.
- **App Integration:** Offers an optional smart device application to act as a valet/service mode or automatic disarm when the phone is nearby.
- **Under-the-Radar Design:** Completely quiet operation without any flashing LED lights to provide away its location.

Standard Immobilisers vs. The Ghost 2

To comprehend why car owners are making the switch, it helps to compare the Ghost 2 with older security technologies.
