What is the Aviator Game Online?

At its core, Aviator is a multiplayer social game including an increasing curve that can crash at any time. When a round begins, a virtual aircraft removes, and as it gains altitude, a multiplier coefficient begins to grow.

The main goal for the player is simple: **cash out before the plane flies away**.

If a player cashes out effectively, their stake is increased by the current coefficient. However, if the plane flies off ("crashes") before the gamer strikes the cash-out button, the bet is lost. The unpredictability of when the aircraft will leave the screen is what creates the suspense and enjoyment of the game.
