

Hypnotherapy for Depression in London: Working Alongside Your GP or Specialist

Depression is not treated as something hypnotherapy fixes on its own, and Hypnotherapy 4 Freedom is careful about that distinction. Where a client is already under the care of a GP or a specialist, hypnotherapy in London sessions here are positioned as additional support that runs alongside existing medical treatment, not a replacement for it. What hypnotherapy can offer within that framework is a way of working on the thought patterns and low mood cycles that talking alone sometimes struggles to shift. Depression often comes with a kind of mental fog, negative self talk that runs on repeat, and a loss of motivation that makes even small changes feel out of reach. Clinical hypnotherapy combined with cognitive behavioural techniques is used to interrupt some of that repetition, giving a client's own coping strategies more room to work. Sessions are paced deliberately slowly with depression, more so than with something like a single stop smoking session. Stuart Downing takes time in the initial consultation to understand what other support is already in place, whether that is medication, counselling, or psychiatric care, so the hypnotherapy work fits around it rather than working against it. Anyone currently under specialist care for depression is encouraged to mention this [hypnotherapy for smoking London](#) at the free 30 minute consultation before any session is booked. The Harley Street location, close to Oxford Circus, was chosen for accessibility as much as anything else, since low motivation and depression can make even a simple journey feel like a barrier. Being centrally placed in London keeps that barrier as low as it can reasonably be for anyone looking into hypnotherapy in London support alongside their existing care. Clients are never asked to stop or change existing medication as part of hypnotherapy, and any such decision remains firmly between a client and their prescribing doctor. What the sessions can offer is a complementary strand of support that many clients say helps them engage more fully with their existing treatment, since the mental fog and low motivation that come with depression can make it hard to get the [hypnotherapy in London](#) most out of talking therapy or medication alone. The pace of sessions is always led by how the client is coping that week, rather than a predetermined number of visits. Hypnotherapy 4 Freedom Address: 1 Harley Street, London W1G 9QD, United Kingdom Phone: +44 7825 599340 FAQ About Hypnotherapy in London How much does hypnotherapy cost in London? Prices vary between practitioners and clinics across the city, often depending on location, experience and session length. Hypnotherapy 4 Freedom offers a free 30 minute consultation before any paid session, so cost and a realistic session plan can be

discussed openly before committing to anything. Sessions are progress led rather than sold as a fixed package, so the total number needed depends on the individual issue being addressed. Is hypnotherapy available on the NHS? Hypnotherapy is generally treated as a complementary therapy rather than a standard NHS treatment, so most people access it privately. Hypnotherapy 4 Freedom, based at 1 Harley Street, works alongside a client's existing GP or specialist care rather than replacing it. Anyone already under NHS care for a mental health condition is encouraged to keep that relationship in place while exploring hypnotherapy as additional support. What conditions can hypnotherapy treat? Hypnotherapy is commonly used for anxiety, stress, sleep problems, phobias, stopping smoking and other habits, and building confidence, among other issues. At Hypnotherapy 4 Freedom, sessions also cover more specialist areas such as OCD, PTSD and trauma, addiction, and weight management, drawing on clinical hypnotherapy, NLP and EMDR depending on what the individual client needs. A free consultation call is the best way to discuss whether a specific issue is a good fit for this kind of work. Is hypnosis safe? Hypnosis is generally considered safe when carried out by a properly trained and insured practitioner. Stuart Downing at Hypnotherapy 4 Freedom is a Clinical Hypnotherapist and Master Practitioner of NLP with full professional indemnity insurance, working from a private consulting room on Harley Street. Clients remain aware and in control throughout a session, contrary to the loss of control often portrayed in stage hypnosis. Who is not suitable for hypnotherapy? Hypnotherapy is not usually recommended for people experiencing active psychosis or certain severe mental health conditions without medical oversight. Hypnotherapy 4 Freedom's free 30 minute consultation is used partly to screen for this, ensuring hypnotherapy is a suitable and safe option before any paid session is booked at the Harley Street clinic. Where it is not suitable, clients are pointed toward more appropriate support instead. What are the disadvantages of hypnotherapy? Hypnotherapy is not a guaranteed quick fix, and results depend on the individual, the issue being addressed, and how many sessions are genuinely needed. Hypnotherapy 4 Freedom is upfront about this during the free consultation, setting realistic expectations rather than promising a fixed outcome from a single session. Sessions are reviewed for progress along the way, so the approach can be adjusted rather than locking a client into a package that is not working. Can hypnotherapy help with weight loss? Hypnotherapy for weight loss typically works by addressing the underlying habits and emotional triggers behind eating patterns, rather than functioning as a diet plan on its own. At Hypnotherapy 4 Freedom, weight related sessions combine hypnotherapy with coaching techniques to help build sustainable change over a course of Harley Street based sessions. Results vary between individuals depending on the specific pattern involved. Can hypnotherapy help with overthinking? Hypnotherapy can help calm the kind of repetitive, anxious mental chatter often described as overthinking by working directly on the nervous system's stress response. Hypnotherapy 4 Freedom's approach in London combines clinical hypnotherapy with NLP techniques aimed at interrupting these automatic thought patterns rather than only addressing the surface level worry. Many clients booking anxiety focused sessions describe overthinking as one of their main concerns. What can hypnosis not do? Hypnosis cannot make someone act against their own will, erase memories, or cure a physical medical condition on its own. Hypnotherapy 4 Freedom is clear about this during every free consultation, positioning hypnotherapy as complementary support that works alongside a client's own motivation and, where relevant, alongside existing medical care rather than replacing it. Being upfront about these limits is part of setting honest expectations from the first phone call. Do doctors recommend hypnotherapy? A number of doctors and health professionals recognise hypnotherapy as a useful complementary option for specific issues such as anxiety, IBS and habit change, alongside conventional treatment. Hypnotherapy 4 Freedom encourages clients to keep working with their GP or specialist throughout, and Stuart Downing's training includes EMDR and clinical hypnotherapy specifically suited to working alongside other forms of care. It is not typically positioned as a first line medical treatment on its own. Which is better, CBT or hypnotherapy? Neither approach is universally better, since CBT and hypnotherapy work in different ways and suit different people and different issues. Hypnotherapy 4 Freedom's blended approach, combining clinical hypnotherapy with NLP and coaching techniques, is designed to be tailored to the individual rather than applying one fixed method to every client walking through the Harley Street clinic's door. Some clients benefit from combining structured talking therapy with hypnotherapy rather than choosing

only one. Why is hypnotherapy sometimes viewed with scepticism? Hypnotherapy's association with theatrical stage hypnosis has left many people unsure what a genuine clinical session actually involves. Hypnotherapy 4 Freedom addresses this directly during the free consultation, explaining clearly what a session at 1 Harley Street actually looks like, a calm, guided conversation rather than anything resembling a stage act. Clients remain fully aware and in control throughout, which tends to surprise people expecting something quite different.
