

Kybella for Under Chin Fullness Near Via Linda Some people do everything right with diet and exercise and still notice a soft pocket of fullness under the chin that seems to ignore their efforts. For residents along Via Linda and the surrounding Scottsdale Ranch streets, a non-surgical option called Kybella is one of the treatments they can discuss at The Skin Shop Medspa Scottsdale. Co-owner Shelly Stump, RN is particularly noted for her Kybella work at the practice on N Scottsdale Rd near Shea Blvd. Kybella is an injectable designed to target fat cells in the area beneath the chin. Rather than a single appointment, it is usually planned as more than one session spaced over time, with swelling in the treated area being something clients are told to expect afterward. It is not a facelift and it does not tighten loose skin, so the first question is whether fullness or laxity is the main concern. That assessment happens at a complimentary consultation. The nurse looks at the jawline and neck from several angles, asks about medical history and talks through whether Kybella, another treatment or a combination makes the most sense. Results vary from person to person, and the number of sessions is set individually. Clients appreciate that recommendations come without pressure, a point Google reviewers raise often when describing their visits.

The Skin Shop Medspa Scottsdale | 10632 N Scottsdale Rd Ste A, Scottsdale, AZ 85254 | (480) 948-1759

Both owners are registered nurses and certified nurse injectors who met while training at the National Laser Institute, where they earned certifications in laser, advanced injectables and cosmetic procedures. They opened their med spa in Scottsdale together and still personally treat clients, which is part of why the practice holds a 5.0 rating from 79 Google reviews. Planning around swelling is the practical side of Kybella that people appreciate hearing about early. Because the under-chin area can look puffy for a period after each session, many clients prefer to schedule treatment when they do not have photos, presentations or big social plans in the days that follow. The nurse explains what to expect, how to care for the area at home and when to come back. For some people the conversation leads to a different plan altogether, and that flexibility is part of why the consultation is complimentary rather than a sales pitch. From Via Linda, the drive is usually a matter of heading to Shea Boulevard and continuing west to Scottsdale Road, with on-site parking and free street parking waiting [med spa scottsdale](#) at the office. Appointments run Tuesday, Wednesday and Friday from 10am to 5pm, with Thursday and Saturday from 10am to 3pm. Call (480) 948-1759 or visit 10632 N Scottsdale Rd Ste A, Scottsdale, AZ 85254 to talk through Kybella.

The Skin Shop Medspa Scottsdale Address: 10632 N Scottsdale Rd Ste A, Scottsdale, AZ 85254 Phone: (480) 948-1759 FAQ About Med Spa Scottsdale What is the difference between a med spa and a day spa? A day spa focuses on relaxation services such as massages and basic facials, while a med spa provides medical aesthetic treatments like Botox, dermal fillers, microneedling and laser procedures. At The Skin Shop Medspa Scottsdale, those treatments are performed by registered nurses who are certified nurse injectors. Every plan begins with a review of your health history during a complimentary consultation. Who performs the treatments at The Skin Shop Medspa Scottsdale? Treatments are performed by the co-owners, Cyndie Nohr, RN and Shelly Stump, RN, both registered nurses and certified nurse injectors with more than 50 years of combined medical experience. They met while training at the National Laser Institute, where each earned certifications in laser, advanced injectables and cosmetic procedures, and they still treat clients personally. How much does Botox cost at a med spa in Scottsdale? Botox pricing depends on how many areas are treated and how much product each area needs, so the cost varies from person to person. At The Skin Shop Medspa Scottsdale, the nurse explains pricing for your specific plan during a complimentary consultation before any treatment. Google reviewers often describe the pricing as fair for the quality of care, and a membership program and financing options are available. How long does Botox last? For most people, the effect of a neurotoxin such as Botox or Jeuveau lasts about three to four months before muscle movement gradually returns. Results vary with factors such as the area treated, muscle strength and metabolism. The nurses set an individual maintenance schedule during your consultation, and online booking through Fresha makes it easy to plan the next visit. How long do lip fillers last? Hyaluronic acid fillers such as Juvederm and

Restylane commonly last six to twelve months or longer, depending on the product used and the area treated. Results vary, and your own timeline is discussed at a complimentary consultation. Co-owner Cyndie Nohr, RN is known for natural-looking lip filler and a go slow approach that leaves room to add more later. Is microneedling good for acne scars? Microneedling is commonly used to help improve the look of acne scarring and uneven texture by prompting the skin's own repair response. The nurses at The Skin Shop Medspa Scottsdale are candid that the goal is improvement rather than removal, and results vary with the type and depth of the scars. Some clients also discuss PRP therapy or Vivace RF microneedling as part of their plan. How many microneedling sessions will I need? Microneedling is usually planned as a series of sessions spaced several weeks apart, because the skin responds gradually. The exact number depends on your skin, your goals and how it responds, so the nurse sets the plan during a complimentary consultation. Reviewers mention receiving a follow-up text after treatment to check how their skin was settling. What is a HydraFacial and is there downtime? A HydraFacial combines cleansing, gentle exfoliation, extraction and hydration in one appointment, which suits skin dried out by the Arizona climate. It generally involves little or no downtime, so most people return to their normal plans afterward. At The Skin Shop Medspa Scottsdale, the treatment can be customized for sensitive skin, something Google reviewers have specifically mentioned. Is laser hair removal permanent? Laser hair removal is best described as long-term hair reduction rather than a permanent result. It requires a series of sessions spaced weeks apart because hair grows in cycles, and results vary by skin type, hair color and treatment area. Both owners hold laser certifications from the National Laser Institute, and sessions are planned around Arizona sun exposure. What should I avoid before Botox or filler? Before injectables, the nurses ask about medications and supplements that may raise the chance of bruising, as well as recent treatments, allergies and upcoming events. It is best to follow the specific guidance you receive at your consultation rather than stopping any prescribed medication on your own. Scheduling filler well ahead of weddings or photo shoots also leaves time for any swelling to settle. Does The Skin Shop offer a membership or financing? Yes. The Skin Shop Medspa Scottsdale offers a membership program for clients who visit regularly, and members who have left Google reviews describe it as worth it. There is also a financing and payment options page for larger treatment plans. The nurses can explain which option fits your plan when you call (480) 948-1759. How do I choose a med spa in Scottsdale? Start by asking who will perform your treatment and what their credentials are, then look for a practice that offers a thorough consultation and sets honest expectations. Read reviews for patterns rather than single comments. The Skin Shop Medspa Scottsdale is RN-owned, offers complimentary consultations, holds a 5.0 rating from 79 Google reviews and sits on N Scottsdale Rd near Shea Blvd.
