What is the Aviator Game?

At its core, Aviator is a social multiplayer crash game. The concept is refreshingly straightforward: an aircraft removes, and as it ascends, a multiplier increases. The goal is basic-- squander your profits before the plane randomly flies away. If the plane flies off before you squander, your bet is lost.

Unlike standard slots where outcomes are figured out by static reels, Aviator puts the decision-making procedure straight into the hands of the player. Do you cash out early for a modest, guaranteed profit, or do you hold on, risking everything for a huge multiplier?

Key Characteristics of Aviator

- **Provably Fair Technology:** The game uses cryptographic technology to ensure 100% fairness of the game results.
- **Real-Time Multiplayer:** Players can see what bets others are making and when they cash out in real-time.
- **High Volatility:** Multipliers can crash within the very first second, or they can skyrocket previous 100x, 500x, or even greater.

How to Play Aviator: Step-by-Step

Playing Aviator needs extremely little learning curve. Here is how a standard round unfolds in an online casino:

1. **Place Your Bet(s):** Before the round starts, gamers have a short window (normally around 5-- 10 seconds) to put one or two bets at the same time.
2. **View the Plane Take Off:** Once the betting round closes, the plane takes off, and the multiplier starts ticking upward from 1.00 x.
3. **Cash Out:** Click the "Cash Out" button before the plane flies away. Your earnings are determined as your original stake increased by the multiplier at the specific minute you squandered.
4. **Collect or Lose:** If you successfully cash out, the funds are immediately contributed to your casino balance. If the plane flies away ("flies off screen") before you cash out, you lose the bet.
