What Are Crypto Casino Games?

Crypto casino games are digital gambling items that use cryptocurrencies-- such as Bitcoin (BTC), Ethereum (ETH), Litecoin (LTC), and Tether (GBPT)-- as the primary medium of exchange for betting. This permits near-instant deal processing, reduced costs, and, most notably, [crypto casino](#) "Provably Fair" video gaming.

Provably Fair technology is the foundation of the crypto gaming industry. It enables players to validate the randomness and fairness of every bet result using cryptographic hashes, guaranteeing the casino can not control the outcomes.
