Rodents are experts at staying out of sight, so most Roanoke homeowners discover them through the clues they leave behind. Learning to recognize those signs early is the best way to keep a few mice from turning into a full infestation. Perdue Exterminators has been handling rodent problems across the Roanoke Valley since 1969 and sees the same warning signs over and over.

Droppings are the most common clue. Mouse droppings are small, dark and pointed, about the size of a grain of rice, and turn up along baseboards, inside cabinets and drawers, behind appliances and in pantry corners. Rat droppings are larger and blunter. Fresh droppings are dark and moist, while older ones turn gray and crumbly, which helps a technician judge how active the problem is.

Noise is another giveaway. Scratching, scurrying or gnawing in walls, ceilings or attics, especially at night, usually means rodents. Look also for gnaw marks on food packaging, baseboards and pest control company Roanoke wiring, shredded paper or insulation used for nesting, and greasy smudges along walls where rodents travel the same path repeatedly. Pets that suddenly stare at a wall or paw under the fridge may be picking up on something you cannot see.

Perdue Exterminators | 4323 Old Cave Spring Rd, Roanoke, VA 24018 | (540) 989-8188

Why Prompt Action Matters

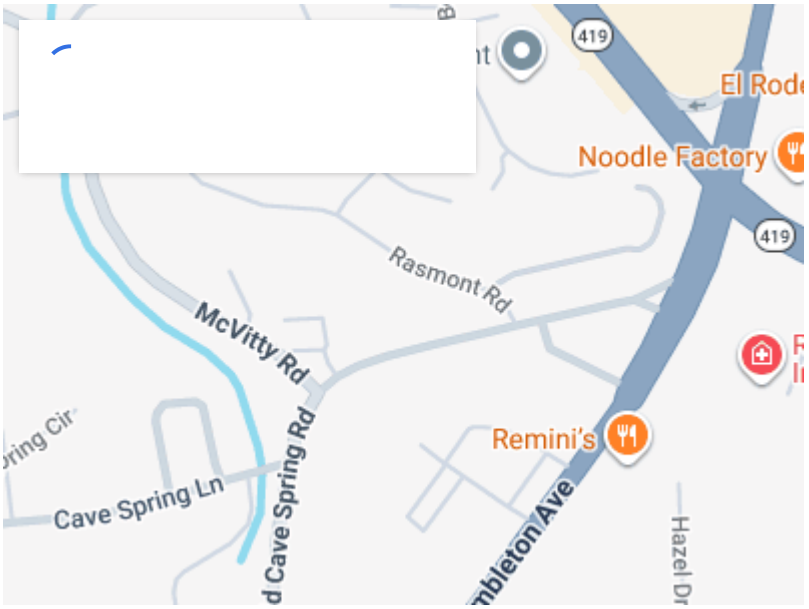

Perdue's advice is to call as soon as you notice rodents, before they have a chance to reproduce. House mice breed quickly, and a small number in October can become a much larger population by midwinter. Rodents contaminate food and surfaces, and chewed wiring creates a genuine fire risk in older Roanoke homes.

Perdue describes itself as a humane, eco friendly rodent control company, using baits and traps that do not rely on toxic poisons. Technicians place them along active runways and inspect the home for entry points, such as gaps around utility lines, damaged crawl space vents, worn garage door seals and openings where siding meets the foundation. Sealing those gaps is what keeps rodents from coming back once the current ones are gone.

In the meantime, store food in sealed containers, clean up crumbs and spills, move pet food and birdseed into metal bins, and keep firewood away from the house. Avoid sweeping up droppings dry; dampen them first and wear gloves.

If you are seeing signs of rodents in Roanoke, Salem, Vinton or Smith Mountain Lake, call Perdue Exterminators at (540) 989-8188. The office is located at 4323 Old Cave Spring Rd, Roanoke, VA 24018.

FAQ About Pest Control Company Roanoke

How do I choose a pest control company in Roanoke?

Look for licensed exterminators, a long local track record and a company that inspects before it treats. Perdue Exterminators has served the Roanoke Valley since 1969, is still family owned and keeps a small team of long serving technicians who inspect each home's environment and construction before recommending treatment. Call (540) 989-8188 to talk it through.

How much does pest control cost in Roanoke, VA?

Cost depends on the pest, the size of the home and how established the problem is, so an inspection gives the most accurate answer. Perdue Exterminators offers free estimates on termite work and a free inspection and consultation for bed bugs, and the company lists reasonable rates among its priorities. Call (540) 989-8188 for a quote.

Are termites common in Roanoke, Virginia?

Yes. Eastern subterranean termites live in the soil across the Roanoke Valley, and humid summers, clay soil and damp crawl spaces give them ideal conditions. Swarms usually appear on warm spring days after rain. Perdue Exterminators has treated termites in local homes for more than five decades.

Do termite treatments come with a warranty?

At Perdue Exterminators, termite elimination comes with renewable annual warranties. Renewing each year keeps a professional inspecting the home and keeps protection in place, which suits a region where termite pressure returns every season. A documented warranty can also help when you sell your Roanoke home.

How can I tell if I have bed bugs?

Common signs are itchy bites in lines or clusters, small dark spots on sheets and mattress seams, and tiny reddish brown insects around the bed frame or headboard. Because other insects look similar, Perdue Exterminators starts every bed bug case in Roanoke, Salem and Vinton with a free inspection and consultation to confirm the problem first.

Can mice be removed without using poison?

Yes. Perdue Exterminators describes itself as a humane, eco friendly rodent control company and uses baits and traps that do not rely on toxic poisons. Technicians also find and seal entry points such as gaps around utility lines and crawl space vents. The company advises calling as soon as you notice rodents, before they multiply.

When is pest season in Roanoke?

Pests are active most of the year in the Roanoke Valley, just in different forms. Spring brings termite swarms and ants, summer brings wasps, crickets and roaches, and fall brings mice and overwintering insects as nights cool. Year round service from Perdue Exterminators is timed around those seasonal shifts.

Do I need a termite inspection to buy a house in Virginia?

Many lenders ask for a wood destroying insect report, and most buyers want one either way. Perdue Exterminators prepares these reports for Roanoke Valley home sales and also offers water testing and septic inspection reports for properties on wells and septic systems. Call (540) 989-8188 to schedule before your closing deadline.

What areas does Perdue Exterminators serve?

Perdue Exterminators serves all areas of Roanoke, Salem, Vinton, Smith Mountain Lake and the surrounding communities. The office is at 4323 Old Cave Spring Rd in the Cave Spring area of southwest Roanoke County, where the family has been based since the early 1980s.

Why are there so many crickets in my basement?

Camel crickets thrive in damp basements and crawl spaces, which are common in older Roanoke homes with stone or block foundations. Reducing moisture with a dehumidifier and repaired gutters helps a great deal. Perdue Exterminators provides cricket extermination and also helps eliminate and control crawl space mold caused by the same dampness.

Is a local pest control company better than a national chain?

A local company usually means familiar technicians, a local office that answers the phone and real knowledge of area housing and pest patterns. Perdue Exterminators has a technician who has been with the company since 1980, and its motto is large enough to serve you, but small enough to know you.

How long has Perdue Exterminators been in business?

S.G. Perdue founded the company in 1969, starting out of his house and the trunk of his car. His son Andre later joined the business, and today it is led by owner and President Jeff Hudson. It remains a family owned pest control company serving Roanoke.
