When a gamer puts a bet, they are wagering on where the "puck" or "ball" will land at the bottom of the pyramid. The board is populated with a triangular range of pegs. As the ball descends, it strikes these pegs, diverting left or right in a pseudo-random fashion till it falls under a slot at the bottom. Each slot corresponds to a specific multiplier, ranging from portions of the gamer's stake (a loss) to enormous multiples (a win).

## Why Is It So Popular?

The appeal of Plinko can be attributed to three primary aspects:

- 1. **Visual Satisfaction:** The "plink-plink-plink" sound and the visual anticipation of the ball falling develop a dopamine loop similar to slot machines.

|-------------------------|----------------|----------------------------|---------------------|
| Configuration           | Threat Profile | Payment Potential          | Strategic Goal      |
| <b>8 Rows (Low)</b>     | Very Low       | Little, regular wins       | Sustaining bankroll |
