What is the Limbo Casino Game?

Players set a target multiplier (e.g., 5.00 x). The game then creates a random multiplier. If the generated multiplier amounts to or greater than the player's target, the bet wins. If it falls below the target, the bet is lost.

The appeal lies in the control it offers the player. You aren't responding to a moving chart in real-time; instead, you pre-select your danger tolerance and enjoy the outcomes instantly.

1. The Low-Multiplier Grind (Safe Strategy)

- **How it works:** Set your target multiplier extremely low, such as 1.05 x to 1.15 x.

4. The Moonshot Strategy (High-Risk/High-Reward)
