## Hardwood Flooring Refinishing Myths Debunked: What You Need to Know

### What is Wood Floor Refinishing?

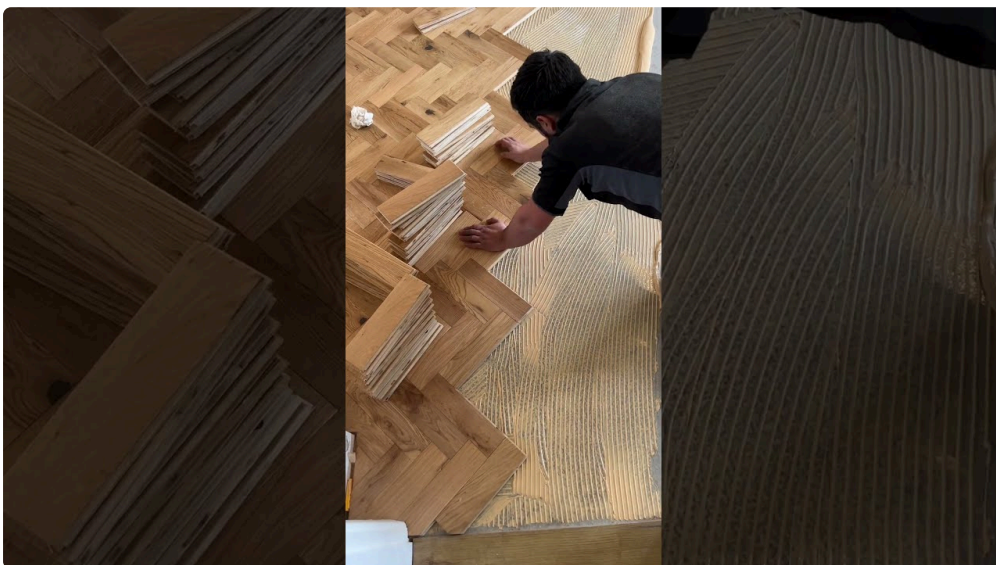

Hardwood floor refinishing entails fining sand down the surface area layer of your hardwood flooring and applying a protective coating. This procedure helps restore its initial appeal while eliminating scratches and flaws. But exactly how often should this be done? Several think that it's an annual job; however, depending upon website traffic and wear, every 5-10 years might suffice.

### Myth 1: Redecorating Is Only for Old Floors

This misconception can't be further from the fact! Several house owners think that only worn-out or broken wood floorings can be redecorated. In truth, also reasonably new floors can gain from redecorating. Gradually, day-to-day life-- kids running around, pet dogs scurrying about-- can leave marks on your beautiful wood floor.

### Myth 2: DIY Hardwood Floor Refinishing Is Easy

Yes, DIY projects can be gratifying, yet refinishing wood floors isn't as simple as slapping on some paint. It requires certain tools like sanders, buffers, and a mutual understanding of coatings. Errors can lead to irregular surfaces or damage that might cost a lot more out of commission than hiring professionals would certainly have.

### Myth 3: All Finishes Are Developed Equal

When it pertains to completing products for hardwood floorings, one size does not fit all! Oil-based surfaces are long lasting yet take longer to completely dry. Water-based surfaces dry promptly but may need more applications for full protection. Understanding these differences is critical in picking the right product for your home.

#### **Myth 4: You Can Refinish Any Kind Of Sort Of Hardwood Floor**

While most strong wood can be refinished multiple times as a result of their thickness, crafted timber has restrictions. The leading layer is thinner than strong wood; therefore refinishing opportunities are restricted. Knowing your flooring kind will aid establish realistic expectations.

#### **Myth 5: Fining sand Will Damage My Floors**

Many property owners avoid fining sand due to worries of harming their floors. The key is making use of correct techniques and devices fit for your specific flooring kind. A seasoned professional will ensure very little elimination of the timber layer while attaining preferred results.

#### **Myth 6: It's Okay to Redecorate When It's Moist**

Humidity plays a considerable function in how well your coating follows the wood surface. Redecorating during high moisture can result in poor attachment and cloudiness in appearance as soon as dried. It's ideal to pick a time when humidity levels are modest for ideal results.

#### **Myth 7: I Do Not Required To Move Furnishings Out For Refinishing**

While some may assume they can shuffle furniture around during the process, it's best practice-- and usually called for-- to move all furniture out of the room being refinished. This permits better accessibility and avoids any damages during fining sand or finishing.

#### **Myth 8: As soon as Ended up, My Floors Are Scratch-Proof**

While high quality finishes do boost durability versus scrapes and dents, no coating is totally scratch-proof! Regular maintenance such as cleansing and using protective pads under furnishings will certainly lengthen the life of your surface significantly.

#### **Myth 9: You Can Refinish Floors Anytime**

Timing plays an important duty when it pertains to refinishing hardwood floorings. Ideally executed in pleasant weather (not also hot or cool), doing this outdoors height moisture periods makes sure far better bonding with finishes.

#### **Myth 10: I Have To Wait Years Before Refinishing Again**
