

When tree debris blocks a driveway, fills a work area, or delays the next stage of a project, fast hauling can be more valuable than waiting for routine pickup. Same-day grapple truck service may help remove large piles of brush, logs, limbs, and yard debris when route availability allows.

Volusia Bobcat & Tree Service - DeLand offers grapple truck pickup in DeLand and surrounding West Volusia communities. Call **(386) 675-7898** to check same-day or next-available scheduling.

Jobs That Benefit From Fast Pickup

Urgent hauling is often requested after tree removal, storm cleanup, lot clearing, [web design](#) roofing access preparation, fence-line clearing, or a contractor project that must stay on schedule. A grapple truck can load bulky material without requiring every limb or log to be cut into small pieces.

What Information Helps With Scheduling

Provide the property address, approximate pile size, debris type, access conditions, and clear photos when possible. Mention whether the material is on the curb, in a driveway, behind a gate, or inside a larger property. This helps determine whether the truck can safely reach the pile.

Same-Day Service Is Subject to Availability

Same-day pickup depends on truck location, route capacity, weather, traffic, and the amount of material involved. Large or mixed piles may require a site visit or multiple loads. Calling early gives the best opportunity to fit the job into the current route.
