Popular Strategies Used by Players

2. The Conservative Approach (Low Multiplier Hunting)

This strategy involves cashing out regularly at extremely low multipliers (1.20 x - 1.30 x). While the individual wins are small, the statistical probability of the aircraft crashing *before* 1.20 x is fairly lower, resulting in a higher win frequency. However, a single crash before the target can erase several previous gains.

3. The Martingale Strategy (High Risk)

Adapted from roulette, this method includes doubling the bet size after every loss so that a single win recovers all previous losses plus a profit.

- **Caution:** This method needs an enormous bankroll and can rapidly hit table limitations or diminish funds throughout a long losing streak.
