1. The Conservative Auto-Cashout Strategy

- **How it works:** Set your auto-cashout to a low, frequent multiplier, such as 1.30 x to 1.50 x.
- **The Goal:** Accumulate small, constant wins over time. While an abrupt 1.00 x crash will still erase the bet, the frequency of hitting 1.4 x is statistically high.

2. The Split-Bet Strategy (Using Dual Betting)

- **How it works:** Place one large bet with an auto-cashout set extremely low (e.g., 1.20 x) to cover your initial stake, and position a second, smaller bet that you manual-cashout for higher multipliers (e.g., 5x or 10x).
- **The Goal:** Mitigate losses. If the second bet wins big, it's pure earnings; if it crashes early, the very first bet hopefully cushioned the blow.

3. The Martingale (Proceed with Caution)

- **How it works:** Double your bet after every loss, aiming to recuperate all previous losses with a single win at a 2.00 x multiplier.
- **The Risk:** This requires a huge bankroll and can rapidly strike table limits or exhaust funds throughout a cold streak. Use this technique just with strict loss limitations.
