What is the Towers Gambling Game?

At its core, the Towers game is a variation of the traditional "minesweeper" genre popular at modern-day online crypto gambling establishments. The facility is basic: the gamer needs to ascend a multi-tiered tower, row by row. On each row, the gamer exists with a choice of tiles. One or more of these tiles consist of a surprise trap (frequently represented as a beast, a bomb, or a skull), while the others consist of a safe multiplier.

If the gamer chooses a safe tile, their overall bet is increased, and they can select to either squander their winnings or proceed to the next row. If they struck a trap, the round ends instantly, and the initial stake is lost.

Key Characteristics of Towers:
