FAQ About Water Damage Restoration

What is water damage restoration?

Water damage restoration is the process of repairing and restoring properties affected by water intrusion. This involves assessing the extent of the damage, removing excess water, drying out affected areas, and repairing or replacing damaged materials to prevent mold growth and further deterioration.

How long does water damage restoration take?

The duration of water damage restoration can vary based on the severity of the damage and the size of the affected area. Typically, the process can take anywhere from a few days to a couple of weeks, depending on drying time and the extent of repairs required.

What steps are involved in water damage restoration?

The main steps in water damage restoration include inspection and assessment, water extraction, drying and dehumidification, cleaning and sanitizing, and restoration and repairs. Each step is vital to ensure the property is safe and habitable after the incident.

Can I stay in my home during water damage restoration?

Whether you can stay in your home during water damage restoration depends on the extent of the damage. If the structure is safe and there are no health hazards, you may be able to remain. However, it's generally advised to vacate if there is significant damage or ongoing repairs.

What causes water damage in homes?

Common causes of water damage in homes include plumbing leaks, roof leaks, flooding from heavy rain, burst pipes, and malfunctioning appliances like washing machines or dishwashers. Identifying the source is crucial for effective restoration.
