Depending on the particular platform or game variant, this jackpot can be won by reaching the outright top of the highest problem tower, landing a particular random trigger, or gathering designated prize signs along the way.

- **Risk vs. Reward Ratio:**
 - *Easy Towers:* Feature more safe tiles per row and less risks, resulting in smaller sized, more frequent multiplier boosts.
 - *Hard/Daredevil Towers:* Feature fewer safe tiles (in some cases only one safe tile among three or four choices), but the multipliers escalate tremendously with every successful action.

- **Cash-Out Feature:** Unlike traditional lottery game tickets or stiff slot spins, gamers can choose to squander their built up earnings at the end of any effective tier, securing their earnings before attempting the next risky climb.
