Lots of conservative gamers choose to play with just 1 or 2 mines. This turns the game into a "grind," where the goal is to hit a few tiles, collect a little revenue, and transfer to the next round. While the payments per round are little, the frequency of wins is greater.

2. High Risk, High Reward

Some gamers choose setting the mines to 10 or more. Because the multiplier jumps considerably with every effective reveal, just two or 3 clicks are needed to double the initial bet. This technique is for those comfortable with high variation and regular losses.

3. Martingale Betting

Obtained from Roulette, the Martingale system involves doubling your bet after every loss. The logic is that when you finally win, you recuperate all previous losses plus a little revenue. **Warning:** This strategy requires a significant bankroll and should be used with extreme care to prevent striking table limitations or diminishing funds.
