The online casino market is continuously developing, moving far from standard reel-spinning slots towards dynamic, skill-infused, and social experiences. Amongst this new age of development, Spribe's **Aviator** has become an outright phenomenon.

What is Aviator?

At its core, Aviator is a **"crash game."** The idea is stealthily easy: an aircraft takes off, and as it ascends, a multiplier coefficient starts to increase, starting at 1.00 x. The objective for the player is simple-- place one or 2 bets before the round starts and hit the "Cash Out" button before the aircraft randomly flies away (crashes).

If a gamer cashes out effectively, their stake is increased by the current value on the screen. However, if the airplane flies away before they cash out, the bet is lost.

The game does not rely on paylines or card mixes. Rather, it uses a Provably Fair cryptographic system, guaranteeing that every round's result is completely random and transparent.
