Instead of watching signs spin on a grid, players see an angler set sail on a small boat. As the boat moves across the water, a multiplier progressively ticks upward, starting at 1.00 x. The objective is basic yet stressful: **squander your jackpots before the fisherman's line snaps or the boat crashes**. If you cash out in time, you win your stake multiplied by the current worth. If the video game crashes before you hit the button, your bet is lost.
