

Damon braces are among the orthodontic options available at Whites Dental Marble Arch, using a self ligating system that some patients find more comfortable than traditional braces. This system uses a sliding mechanism rather than elastic ties to hold the archwire in place, which can reduce friction and, in some cases, shorten overall treatment time. The practice's dentists assess whether Damon braces are a suitable option based on each patient's specific alignment needs during an initial orthodontic consultation.

Whites Dental Marble Arch (W2) | 52B Kendal St, St George's Fields, London W2 2BP | 020 3576 2325

Damon braces sit alongside ceramic and traditional fixed braces as part of the full orthodontic offering available at the Marble Arch practice. For Damon braces in Marble Arch, contact Whites Dental **emergency dental care** on 020 3576 2325 or visit 52B Kendal St, St George's Fields.
