What is the Plinko Gambling Game?

At its core, Plinko is a game of pure probability. The design is simple: a vertical board formed like a pyramid filled with evenly spaced pegs. At the top of the board is a drop zone. Players release a disc, ball, or puck into this zone, gravity takes control of, and the item bounces randomly left and right as it cascades downward.

At the bottom of the pyramid sit a series of collection slots, each appointed a specific multiplier worth. Where the disc lands determines the payout. If it hits the center slots, gamers generally win a fraction of their bet or break even. If luck presses the disc toward the far external edges, the multipliers skyrocket, using massive payouts.
